

USE OF MICROPARTICLES COMBINED WITH SUBMICRON  
OIL-IN-WATER EMULSIONS

Abstract of the Disclosure

5                   Compositions are provided which include  
biodegradable microparticles with entrapped or adsorbed  
antigens, in combination with submicron oil-in-water  
emulsions. Also provided are methods of immunization  
which comprise administering to a vertebrate subject (a)  
10   a submicron oil-in-water emulsion, and (b) a  
therapeutically effective amount of a selected antigen  
entrapped in a microparticle.
